

## Splice\_logo

The splice donor site is located at the very beginning of an intron  
(-5 IS THE END OF EXON IN DONOR SEQ)

All splice site

# Canocial donor site (GT)

The splice acceptor site at the 3' end of the intron terminates the intron with an almost invariant AG sequence (-5 IS THE START OF EXON IN ACCEPTOR SEQ)

All acceptor site

Canocial acceptor site (AG)
